

BRAND STYLE GUIDE

Visual Identity & Usage Standards

VERSION 3.0 · MARCH 2026

Broken Arrow Consulting Inc.

Remote Sensing · Environmental Intelligence · GIS Modernization

brokenarrow.pro

*"Data has become abundant and cheap.
What's scarce is knowing what to ask from it."*

Brand Identity

Broken Arrow Consulting operates at the intersection of environmental science, remote sensing, and data analytics. The visual identity is built on a slate-dark foundation with a signature three-color gradient that encodes the company's range: green for vegetation and land, purple for technology and analysis, orange for warmth, trust, and prairie earth.

DESIGN PRINCIPLES

SLATE BASE

Dark, cool backgrounds. White headings.
The brand is quiet until it needs to speak.

GRADIENT AS SIGNAL

The signature bar appears sparingly — nav rules, header accents, dividers. Never as a fill.

COLOR WITH PURPOSE

Each gradient stop maps to a domain.
Color is information, not decoration.

FIELD-TESTED

Prairie roots inform every choice. If a rancher with a stats degree wouldn't respect it, rethink it.

VOICE & TONE

Direct, confident, plainspoken. Write like you'd explain it to a smart rancher who also understands statistics. Avoid jargon for its own sake but don't dumb down the science. The signature line — "You Can Just Do Things" — captures the brand ethos: capability without permission.

DO

- Use concrete numbers and examples
- Lead with the insight, not the method
- Be conversational in blogs, precise in reports
- Reference field experience naturally

DON'T

- Use buzzwords without substance
- Oversell capabilities you can't deliver
- Default to passive voice
- Hide behind academic language

Green → Purple → Orange

Three anchor colors with smooth transitions. Each maps to a domain of expertise.

SITE SOURCE COLORS → MUTED BRAND PALETTE

Source colors are vivid for screen UI. The muted versions maintain the hue family while reducing saturation for print, documents, and professional contexts.

Use the muted stops in all brand materials. The vivid originals live on the website only.

THE FULL GRADIENT

CSS IMPLEMENTATION

```
/* Broken Arrow signature gradient */
background: linear-gradient(90deg,
  #5E9B72, #5E8B8A, #7E6D94, #947068, #BF9555);

/* Vivid site version: #28c76f, #9b59d6, #f5a623 */
```

USAGE RULES

YES — Thin rules and dividers

YES — Cover / title page accents

YES — Favicon / social avatar fill

NO — Background fills

NO — Gradient text

NO — Large shape fills

Nav underline, section breaks, header bars. 1–4px height.

Report title rules, slide deck header bars.

Gradient inside the arrow mark for small-format use.

Never use as full-area background. Signal, not surface.

Never apply gradient to text. Pull individual stops instead.

Don't fill buttons, cards, or panels with the gradient.

USING INDIVIDUAL STOPS AS ACCENT COLORS

● Green #5E9B72	Environmental content — NDVI, reclamation, vegetation, field reports
● Teal #5E8B8A	Neutral data — chart axes, metadata, secondary information
● Purple #7E6D94	Technology — code, satellite data, RPI methodology, analytical work
● Orange #BF9555	Warm accent — headings on dark, CTA buttons, links, key callouts
● Mauve #947068	Supporting — table alternation, de-emphasized elements, earth tones

Logo Variants

Three formats: mark only, full lockup with wordmark, and outline.

All are monochrome by default. Add gradient or color per the rules below.

MARK ONLY — PRIMARY

BLACK ON LIGHT

WHITE ON DARK

Usage

Favicons, app icons, social avatars
Small-format: 24px+ digital, 10mm+ print
Use when full lockup won't fit

On light backgrounds: black mark
On dark backgrounds: white mark
On photos: white mark with subtle shadow/glow for legibility

FULL LOCKUP — MARK + WORDMARK

FULL LOCKUP — BLACK ON LIGHT

Usage

Website header, letterhead, title pages
Minimum width: 120px digital, 35mm print
Black on light, white on dark
Always horizontal — never stack vertically

OUTLINE VARIANT

OUTLINE — SUBTLE / WATERMARK

For watermarks, subtle backgrounds, and low-contrast decorative placements.
Never use as the primary mark.

Works well as a background element on slide decks or report cover pages at low opacity (10–20%).

LOGO RULES

- Clear space: height of the chevron on all sides.
- Never stretch, rotate, add shadows, or recolor outside approved palette.
- Gradient fill inside the mark is approved for social/favicon use only.
- When adding text/tagline beneath the mark, use the style guide typography.

Color Palette

Slate base + gradient-derived accents. Dark theme default, light for print docs.

SLATE BASE — DARK THEME

			
Slate Dark #14181E Primary bg	Slate Mid #1E2430 Cards / panels	Slate Border #2D3548 Dividers	White #FFFFFF Headings

GRADIENT STOPS — ACCENT COLORS

				
Green #5E9B72 Environmental	Teal #5E8B8A Neutral data	Purple #7E6D94 Technology	Mauve #947068 Earth / support	Orange #BF9555 Warm accent

LIGHT THEME — DOCUMENTS & PRINT

				
White #FFFFFF Page background	Warm Gray #F2EDE6 Section fills	Slate Dark #1E2430 Body text	Orange #BF9555 Headings / accent	Caption Gray #6B7280 Captions

COLOR USAGE RULES

- The full gradient only appears as a thin bar/rule. Everywhere else, use individual stops.
- Orange (#BF9555) is the default warm accent — links, headings, key callouts on dark backgrounds.
- Green (#5E9B72) marks environmental content. Purple (#7E6D94) marks technology content.
- On dark: White headings, Body Text (#A0A8B8) for paragraphs, Orange for accent.
- On light: Slate (#1E2430) body text, Orange for headings / rules, Caption Gray for footnotes.
- Contrast: White on Slate Dark = 16.8:1 (AAA). Body Text on Slate Dark = 7.1:1 (AAA).
- Orange on Slate Dark = 5.7:1 (AA). Orange on White = 3.0:1 (large text / decorative only).
- For headings on light backgrounds where contrast matters, use Slate Dark instead of Orange.
- Never use gradient stops as background fills — they are accent and signal colors only.

Typography System

Two typeface families. Both free, both available everywhere it matters.

PRIMARY — INTER

Inter

Google Fonts · Variable 100–900 · rsms.me/inter · Open source

ABCDEFGHIJKLMNOPQRSTUVWXYZ

abcdefghijklmnopqrstuvwxyz 0123456789 !@#\$%

HEADINGS · BODY TEXT · UI · DOCUMENTS · EMAILS · PRESENTATIONS

Inter is intentionally neutral — it disappears so the data speaks. Distinctiveness comes from the gradient and color system, not the typeface. System fallback: Calibri (Windows), SF Pro (Mac).

SECONDARY — JETBRAINS MONO

JetBrains Mono

jetbrains.com/lp/mono · Monospaced · Free · Ligatures

ndvi = (nir - red) / (nir + red) # chi95 envelope
DLS 07-14-035-28W3 | MODIS 250m | Sentinel-2 L2A

CODE · DATA TABLES · DLS COORDINATES · TECHNICAL CALLOUTS

TYPE SCALE

Display	Broken Arrow	Inter Bold 28–36pt Cover titles, hero text
H1	Broken Arrow	Inter SemiBold 20–24pt Section headings
H2	Broken Arrow	Inter SemiBold 15–18pt Subsections
H3	Broken Arrow	Inter Medium 12–14pt Card headers, labels
Body	Broken Arrow	Inter Regular 10–11pt Paragraphs, emails
Caption	Broken Arrow	Inter Regular 8–9pt Footnotes, metadata
Mono	Broken Arrow	JetBrains Mono 9–10pt Code, coordinates, data

Applying the Brand

Every deliverable should feel like Broken Arrow — clean, confident, consistent.

CLIENT REPORTS & PROPOSALS — LIGHT THEME

Layout

- White bg, Warm Gray (#F2EDE6) section fills
- Gradient header bar + white company name
- Body: Slate (#1E2430), Inter 10–11pt
- Headings: Orange (#BF9555) or Slate bold
- Captions: Caption Gray (#6B7280), 8pt
- 1" margins, US Letter (8.5 × 11")
- Footer: gradient rule + site + page #
- Black mark on title page or header
- Outline mark as watermark at 10% opacity

PRESENTATIONS — DARK THEME

Layout

- Slate Dark (#14181E) bg, 16:9 aspect ratio
- Gradient bar top of each slide (3–4px)
- Orange titles, White body, Body Text captions
- Charts: Green → Orange → Teal → Purple → Mauve
- White mark, bottom-right, small
- Max 6 text lines per slide
- Outline mark as bg watermark at 5% opacity

EMAIL, EXCEL & DIGITAL

- Email sig: Name / title / phone / brokenarrow.pro. Orange (#BF9555) URL in HTML email.
- Excel headers: Slate Dark (#14181E) fill + white text, or gradient-colored header row.
- Freeze top row. Inter or Calibri. 10pt body, 11pt bold headers.
- Chart color order: Green → Orange → Teal → Purple → Mauve.
- LinkedIn: Black mark as avatar. Gradient rule in banner image.
- Blog: continues dark theme. Gradient nav rule. Orange links. Green for env content.
